lacobel

Lacobel, AGC Flat Glass Europe's range of painted glass, reflects the brilliance of your design – it intensifies colour and transforms it into sparkling rays of light that add magic and movement to interiors. It plays with shadows and light to capture the ever-changing spectrum of colour and enhances and enlarges rooms by adding depth and creating amazing new perspectives. The new Lacobel range comprises 25 different colours that you can use to create a sense of light and space.

Enhance your rooms with room enhance

A sparkling material used to illuminate an object. See the red surface of the table, incandescent in its dark environment. The right material in the perfect colour.

Colour your reflection

Painted glass is the ideal instrument for giving colour a dazzling solo. Improvising a symphony of reflections. Creating an atmosphere that never ceases to amaze us.

This wall cladding is a hymn to colour. A finish that demands respect, albeit with a knowing wink. The table surface echoes this coloured refrain, but never tires.

Let
the light
shine out

Light is constantly changing. The light from a spring morning is in no way resembles the light before a storm. This wall cladding captures light in the kitchen and shines it throughout the home.

Lacobel painted glass constantly creates new dimensions of colour by reflecting the subtle ways light interacts.

Light and colour are central to the beauty of Lacobel, which can be combined with wood, steel or stone for stunning effects.

COUPLING THE BEAUTY OF PAINT WITH THE BENEFITS OF GLASS

Discover Lacobel's **25 contemporary colourways**.
Fill your rooms with a thousand rays of light.

Multiple applications:

Lacobel glass can only be used for interior applications. It can be used for **furnishings** (e.g. sliding or fixed doors, tables, shelving, display cases), as an indoor **wall covering** for commercial applications (e.g. in offices, restaurants, shops) or residential spaces (e.g. kitchens, bathrooms, living rooms) or even as a **writing board**.

Practical advantages:

The moisture-proof layer of paint on the back of Lacobel glass is always positioned on the inside of the supporting structure. This protects it from any damage and ensures that the colour and appearance of the glass are maintained. Lacobel glass is easy to bond using silicone adhesives, tile adhesives or double-sided adhesives.

For more information, see our "Cutting and Installation Guide" on www.yourglass.com.

LACOBEL SAFE for extra safety.

SAFE is a polypropylene film placed on the painted side of the glass. It offers users two key advantages: the layer of paint on the glass is protected from scratches, and if the glass breaks, the shards will remain attached to the film (thus avoiding injury or damage).

Discover the full range of **25 Lacobel Standard colours** on page 22 (available in stock).

We can also create **customised colourways** for orders over 200 m² (see MyColour by Lacobel - page 23).

The exact colour of Lacobel may vary depending on the thickness of the glass. Some of the colours shown in the photographs may look different in real life. AGC Glass Europe suggests that you look at samples of Lacobel when selecting a colour.

The paint used for Lacobel is **environmentally friendly** – it does not contain heavy metals or chemical substances that damage the environment. There are also satin-finish versions of some Lacobel glasses, under the brand name **Matelac** (see www.yourglass.com for more information).

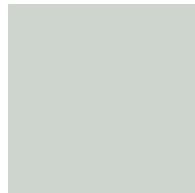

SPECIFICATIONS

PROCESSING POSSIBILITIES			COMMENTS
Safety	Toughened	no	Lacobel Safe complies with EN 12600.
	Laminated	no	
	Safe	yes	
Cutting	Rectangular or circular	yes	Lacobel and Lacobel Safe can be cut in the same way as traditional mirror glass - see "Processing guide".

MYCOLOUR by Lacobel

ΜΥΧΡΟΧΡΩΜΑ by Lacobel

MyColour by Lacobel is an online service which offers the possibility of designing your own Lacobel creation. With this unique tool you can quickly order Lacobel glass in the colour of your choice (if your order is for at least 200 m²).

HOW IT WORKS

The site is easy to use:

- Go to www.YourGlass.com
- Click on the 'MyColour by Lacobel' banner
- Enter your login and password. To obtain these details, please contact your nearest AGC sales office

The system will then give you two possibilities:

- you can either type in the relevant RAL or Pantone colour reference (if you already know it)
- or you can send a sample (a piece of fabric, paper or any other item) to the address given on the site and you will receive a sample of painted glass in the colour you wish to reproduce.

If the test is conclusive, you can place your order using the paint reference we give you. Orders will be delivered within 3 to 4 weeks.

BENEFITS

- Service based on **customer requirements**
- Orders for at least 200 m²
- Quick delivery times
- A traceability system means you can see the status of your order (product being produced, product being delivered, etc.)
